XCalibur1645
NXP QorIQ Eight-Core P4080 Processor-Based Conduction-Cooled 6U VPX Module

The XCalibur1645 is a high-performance, 6U VPX, single board computer supporting NXP (formerly Freescale) QorIQ P3 and P4 processors. Featuring a conduction-cooled design compliant with the Two-Level Maintenance (2LM) standard defined in VITA 48.2 Type 1, the XCalibur1645 is a powerful, feature-rich solution for the next generation of compute-intensive embedded applications.

The P4080 processor brings the raw power of eight e500mc cores running at up to 1.5 GHz and dual-channel DDR3 memory, delivering unparalleled multi-core performance. For applications that are more power-conscious, the P3041 processor offers four e500mc cores running at up to 1.5 GHz with a single channel of DDR3 memory, all within a significantly reduced power envelope. Additional reduced-function processors are available to meet any power and performance budget.

Operating system support is available for Wind River VxWorks, Green Hills INTEGRITY, QNX Neutrino, LynxWorks LynxOS, and Linux. Wind River VxWorks and Linux BSPs may optionally be paired with the NXP hypervisor software to facilitate secure partitioning.
**Processor**
- NXP (formerly Freescale) QorIQ P4080 processor
- Eight Power Architecture® e500mc cores at up to 1.5 GHz
- 128 kB L2 cache per core
- 1 MB L3 cache per channel
- IEEE 754 Floating-Point Unit (FPU) support

**Alternate Processor Configurations**
- P3041 processor with four Power Architecture® e500mc cores at up to 1.5 GHz
- P4040 processor with four Power Architecture® e500mc cores at up to 1.5 GHz

**Memory**
- 2 to 16 GB of DDR3 ECC SDRAM in two channels
- Up to 512 MB of NOR flash (with redundancy)
- Up to 64 GB of CPU NAND flash

**IPMI**
- Onboard management controller
- VITA 46.11 Tier 1 and Tier 2 IPMI Controller (IPMC)

**Software Support**
- Linux BSP with optional NXP hypervisor support for secure partitioning
- Wind River VxWorks BSP with optional NXP hypervisor support for secure partitioning
- Greens Hills INTEGRITY BSP
- LynuxWorks LynxOS BSP (contact factory)

**Environmental Requirements**
- Contact factory for appropriate board configuration based on environmental requirements.
- Supported ruggedization levels (see chart below): 5
- Conformal coating available as an ordering option

**Power Requirements**
- Power will vary based on configuration and usage. Please consult factory.
